**MANUFACTURER'S DECLARATION**

for metallic materials according to §17 Abs. 2 S. 1 TrinkwV

Company

**WATTS Industries Bulgaria EAD**

- hereinafter referred to as "manufacturer" –

gives the following manufacturer's declaration to

**Sanitär-Union GmbH & Co. KG, Münsterstr. 13, 55116 Mainz**

- hereinafter referred to as "SU" -

for the benefit of the direct and indirect shareholders (i.e. associated companies) of SU.

---

The manufacturer declares for the following products and/or series of the exclusive brand  
DIANA/DITECH:

**Products – series PA, PL, PT3, PT4, PT5, PG, F+R**

- I. Basically, all products distributed by the manufacturer, which he puts into circulation as of the date of this manufacturer's declaration and which are intended for the new installation or maintenance of systems for the production, treatment or distribution of drinking water and have contact with drinking water, that these are manufactured/produced exclusively from materials suitable for drinking water hygiene and thus comply with the requirements of §17 Para. 2 of the Drinking Water Ordinance: (please mark accordingly)
- only materials of the metal assessment basis of the UBA (as of December 20, 2019) or of the 4MS material list are used \*
  - materials are used that are not listed in the metal assessment basis (as of December 20, 2019) of the UBA or the 4MS list of materials. Their use in contact with drinking water does not lead to the limit values specified by the TrinkwV being exceeded if the product is used properly \*.

This means that the above-mentioned products and/or series can be used for drinking water installations without having to take additional measures to ensure drinking water quality. \*\*

As far as not all metal products and/or product groups, are covered by the previous declaration, the manufacturer declares for the following products and/or series of the exclusive brand DIANA / DITECH:

**N/A**

- I. in principle, all products marketed by the manufacturer as of the date of this manufacturer's declaration and which are intended for the new installation or maintenance of systems for the production, treatment or distribution of drinking water and which come into contact with drinking water, that they are not manufactured/produced exclusively from materials suitable for drinking water hygiene.
- if the technical installation regulations in Germany are observed, the above-mentioned products/series which are not exclusively manufactured/produced from materials suitable for drinking water hygiene can, however, be used in drinking water installations in Germany with the following restrictions/additional measures: \*

The manufacturer agrees that his declaration(s) is/are brought to the attention of the shareholders of SU (in particular the connecting houses or the shareholder companies).

The content of this declaration thus becomes part of the agreed quality of the above-mentioned products and series of the exclusive brand DIANA/DITECH vis-à-vis the connecting houses, insofar as these are shareholders of SU.
